<b>VITICULTURE / HARVEST</b>	The year 2019 was featured by spring rains, which allowed vital water reserves, suitable for a hot summer with low rainfall. The slightly harsher and wetter weather in the first half of the year slightly delayed the vine's growth cycle compared to recent years. A hot but regular summer, with some peaks of temperature without precipitation, was followed by a September with nice weather and good temperature ranges, which accompanied gradually the phenolic ripening of the grapes.
